```
I used to think that I was sure
          Em7
Of what made people tick
        D                       A
You strip 'em down right to their core
          Bm7             Em7
And find a self-centered prick
                    D                           A
I thought when the push came to the shove
                              G
I knew just what I'd do
          D                       A
I'd put me before you

But you didn't
Em
I guess I didn't

[Pre-Chorus]
                              A                 Bm
You can be a cynic and a sinner
          G                   D
Who can only see the flaws
                    A
But even if you lost your way
          Bm                         G
You don't have to stay a lost cause

[Chorus]
                              D
So can we do a little good?
                      Bm7
Maybe give a little more?
                  A                           G
Work a little harder than we did the day before
                      D
It only takes a little good
                      Am7
And some doin' what you can
                  C                           G
```

```
Takin' every chance to make the choice to be a better man
                  D        C        G
So do a little good

[Verse 2]
D                          A
Well, I have spent each Christmas Day
Em
Obsessed with wrong and right
        D                         A
You thought change could only work one way
        Em
It had to happen in one night
        D                        A
But now you know, oh, now you know
        Em7              G                D
The line of good and bad is not so clean
        A              G
And what we are is somethin' in-between

[Pre-Chorus]
        A          Bm
It's an everyday decision
        G              D
Two steps forward, one step back
        A              Bm
But if you try to do what's right
                G
You're on the right track

[Chorus]
                         D
So try to do a little good
                       Bm7
Maybe give a little more?
                    A                      G
Work a little harder than you did the day before (Work a
little harder)
                       D
It only takes a little good
```

Am7
And some doin' what you can
                    C   **G**
Takin' every chance to make the choice to help your fellow
man
                         D
So do a little good (Hey)
C   **G**
Just a little, just a little, just a little (Hey, hey)

[Bridge]
D
Maybe there's no magic wand
D
Maybe there's no switch to flip (Oh)
D
Some days you may soar beyond
D
Some days you may soar beyond
D
And some days you start to slip

[Pre-Chorus]
Bm
You can give the world some good
E
In the daily give-and-take
C   **A**   **B**
With every ripple, ripple, ripple that you make

[Chorus]
          E
Do a little good (Do a little good)
                               C#m
Maybe give a little more (Give a little more)
                   B   **A**
Work a little harder than you did the day before (Doin' the
world a little good)
                               E
It only takes a little good (Just a little good)

```
                                       Bm
And some doin' what you can (Do what you can)
                  D                                          A
Takin' every chance to make the choice to help your fellow
man, yeah

[Bridge]
        C#m                   E
And whether it's Christmas Day
A                             C#m
Or a random day in May (Or a day in May)
                              A
You're gonna wanna say
          F#m                           F#
That you tried the best you could
          A
And a little is enough

A little is enough, a little is enough

[Outro]
                   E
So do a little good (Hey)

(Just a little, just a little, just a little)
               D                A
Do a little good, do a little good (Do a little good)

(Maybe there's no magic wand)
E
Do a little good

(Just a little, just a little, just a little)

(Ripple, ripple)
D               A
Give a little more (Do a little good)
E                                 D        A
Some days you may soar beyond

(Just a little, just a little, just a little)
```

(Ripple, ripple)

(Do a little good)
C   **D**   **E**
Do a little good
